

Montenegro: Wild Wild West

Wild Wild West

This interesting country sits in the south part of Europe and its astonishing untamed nature makes it a real gem of the Balkan Peninsula. Nature seems to have gifted this relatively small area with an array of natural wonders, which makes this land interesting to everyone, especially to nature lovers. It also makes this country a real delight for tourists.

Natural wonders of Montenegro, such as its mountains, rivers, canyons, lakes, forests, towns, the Adriatic coastline, make it special and extraordinary. A country so small that it is believed that you could tour it in its entirety in a week; however, if its hills were flattened, it would be the biggest country in the world! Another interesting tidbit – this is the only country in the world where its natural wonders could bring about the entire country to be declared a national park under UNESCO protection - so far, it has been done with 50% of its territory.
