

National park Tara

“This is how I imagine heaven”

“This is how I imagine heaven,” said Dr. Aitken Clark, the director of the European Foundation for the Conservation of Nature and National Parks, the first time he saw the Tara Mountain.

Tara is located in the utmost west of Serbia, at the border with Bosnia and Herzegovina. The canyon of the Drina River is in the northwest, and the Kremna Valley connects it with the Zlatibor Mountain in the southeast. The remoteness contributed to this mountain becoming a secluded and unique place for all nature lovers.

In 1981 one part of the Tara Mountain was declared as a national park, since it is an area with a large number of diverse natural ecosystems of national importance, extraordinary landscape, and historical heritage, in which man lives together with nature.

ADDITIONAL INFORMATION:

DIVING: Zaovine Lake got its name from the Zaovine place, near which it is located. It belongs to the group of artificial lakes when the flow of Beli Rzav River was blocked by a dam. It is located at 880 meters above sea level, and the greatest depth, depending on the water level, is about 100 meters. Diving at Lake Zaovine is a special diving experience. Of all the activities that we offer you, only diving can be chosen as a daily activity. We do not repeat any other activity!

CANYONING: is one of the youngest adventure activities in our country. This activity includes crossing the river bed, with or without water, passing through water, going down waterfalls, crawling into narrow gaps, jumping into whirlpools, crossing cascades... The weight of the canyon itself and the terrain dictates the use of equipment. Tara Mountain abounds in a large number of canyons. This time we have chosen one of the most beautiful and easiest for you. Anyone who wants to get a taste of this activity can go and enjoy the hidden terrains of Tara Mountain.

ROCK CLIMBING (Free climbing): is a sport in which the use of climbing equipment is not allowed for advancement, but it is only used for safety in case of a fall. Sport climbing originated from alpinism. Instead of climbing dry rock, climbing mixes and mastering peaks, sport climbers began to master extremely difficult details with strong and daily training and pushed the limits of climbing. On the vertical rocks of Sokolina, each of you will be able to try this climbing technique and push your limits.
